

## The 2023 – 2024 Trauma Webinar Series – Part Eight: *Invisible and Under-Reported: Non-Fatal Strangulation*

**Tuesday, April 30, 2024**

Webinar Login: 11:50 am – 12:00 pm

Webinar: 12:00 – 1:00 pm

Virtual – WebEx

### OVERVIEW

Non-fatal strangulation is a dangerous and potentially fatal event and is being diagnosed in increasing numbers across the United States. It is often invisible and overlooked by healthcare providers and will likely be under-reported by our patients. Healthcare clinicians receive minimal training in the identification and response to non-fatal strangulation. Join us as we learn more about non-fatal strangulation and the associated risk factors this presents for adverse health outcomes, including the risk of being murdered.

### LEARNING OBJECTIVE(S)

At the conclusion of this learning activity, participants will be able to:

- Discuss the plan of care for patients who have experienced non-fatal strangulation.
